East Lansing, MI 48823

PROFESSIONAL SUMMARY

Results-driven and detail-oriented Frontend Developer with a strong passion for creating interactive, user-friendly web applications. Experienced in leveraging modern web technologies to build scalable and efficient solutions. Skilled in optimizing performance, debugging, and collaborating with cross-functional teams to deliver high-quality products. Proficient at working with data and integrating APIs to enhance user experiences. Passionate about DIY projects, electronics, and 3D printing, with hands-on experience in designing and prototyping custom products. Proven ability to manage projects, meet deadlines, and contribute to team success.

EDUCATION

Michigan State University, College of Engineering, East Lansing, MI

Bachelor of Science, Computer Science

2021 – 2025

GPA: 3.71/4.0

Dean's List: 2021, 2022, 2024

Relevant Courses: Games and Interactivity, Object-Oriented Software Development, Computer Systems, Algorithms and Data Structures

TECHNICAL SKILLS

Coding Language: C++, JavaScript, TypeScript, Python, HTML, CSS, SQL Database, React, Cloudscape, AWS Services

Source Control: Gitlab, GitHub

EMPLOYMENT/RESEARCH EXPERIENCE

Michigan State University

Biomechanical Design Research Laboratory, East Lansing, MI | App Developer

Fall 2022 – Spring 2023

- Designed, developed, and debugged a mobile application that established Bluetooth communication with an Arduino for real-time data transfer and responsive control.
- Implemented a secure user login system to ensure data privacy and access control, while collaborating with a post-doctoral researcher to retrieve and display data on mobile devices using Java and GitHub for version control.
- Conducted rigorous debugging to resolve communication errors between the app and a wheelchair's control system, ensuring smooth, real-time interaction.
- Demonstrated expertise in cross-platform mobile app development, embedded systems integration, and collaborative project execution.

OTHER PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) Capstone Project | Lead Frontend Developer

Spring 2025 – Summer 2025

- Designed and developed a semantic search website with AWS services, delivering a scalable and user-friendly solution.
- Led frontend development, creating responsive and intuitive user interfaces, while contributing to backend development by integrating APIs and optimizing data retrieval for efficient and accurate search results.
- Collaborated with a cross-functional team to implement semantic search algorithms, enabling users to find relevant information faster and with greater precision.
- Utilized agile methodologies to manage tasks, meet deadlines, and deliver a fully functional prototype, showcasing strong teamwork and project management skills.

PRINT3D DESIGN | Co-Founder Designer

Fall 2024 - Present

- Co-founded and managed a successful 3D printing and design service, delivering end-to-end solutions from initial concept development to final prototype delivery using advanced CAD software.
- Designed and fabricated custom 3D products tailored to client needs, demonstrating strong technical and creative skills.
- Built and maintained client relationships, ensuring high satisfaction and repeat business.
- Calibrated the 3D printer to fit our personal needs, such as printing time, quantity of filament used, and printing procedure.

Unity Game Development | Game Developer

Fall 2020 - Spring 2021

- Created and developed immersive games using C++ and Unity, adding background music and creating intuitive user interfaces to enhance player immersion and interaction.
- Modified scripts in Visual Studio to adapt existing code, demonstrating strong problem-solving skills and the ability to meet project deadlines.
